

DEFEAT
CYSTIC FIBROSIS
IN EUROPE

- *Cystic Fibrosis is the most frequent life threatening disease in Europe*
 - *1/30 Europeans carry the gene that causes Cystic Fibrosis*
 - *30.000 children and young adults live with Cystic Fibrosis*
- *Some get to 40 years old...others 4, depending on where they live in Europe*
 - *Help to make good care available to every CF patient !*

2°
**EUROPEAN
CYSTIC FIBROSIS AWARENESS DAY**

21 NOVEMBER 2007
